

MINERALOGIE

THE BENEFITS OF MINERALOGIE MINERAL MAKEUP

MINERALOGIE MAKEUP ACCENTUATES A WOMAN'S BEAUTY, HELPING THEM TO LOOK AND FEEL JUST AS BEAUTIFUL ON THE OUTSIDE AS THEY DO ON THE INSIDE.

Using the best pharmaceutical grade ingredients, manufacturing without additives such as talcs, starches, dyes and perfumes. Mineralogie delivers products that are not only glamorous and long lasting, but products that help to hydrate and protect the skin.

IT PROTECTS YOUR SKIN FROM AGEING

Mineralogie makeup contains Vitamins A & E, because they work as natural anti-oxidants which help protect the skin from pollutants and keep the skin looking young and fresh. Mineralogie makeup is also formulated with zinc oxide and titanium dioxide, these minerals promote sun protection and they are also water resistant.

IT'S ACTUALLY GOOD FOR YOUR SKIN

Tiny mineral pigments nurture your skin by forming a sheer protective layer that lets oxygen in, allowing your skin to breathe; yet blocks out free radicals that can damage skin. Mineralogie makeup doesn't contain skin-smothering oils that clog and enlarge pores. Our products are perfume and dye-free, both these ingredients are known causes for skin allergies. And because it has no talc or alcohol, drying agents commonly found in other cosmetics, your skin stays hydrated and supple.

IT'S A GIFT FROM NATURE

Mineralogie makeup gets its radiant colour from the earth's natural minerals. Colour pigments are refined and blended into a loose cosmetic powder that reflects the light, minimising flaws and enhancing your skin's own natural beauty.

IT'S SHEER YET POTENT

The colour saturation of these minerals is amazing. A little goes a long way, yet it's delicate enough to let you layer colour over colour without that 'heavy made up' look. The magic property of mineral makeup enables it to cover so completely, providing a radiant glow, whilst looking naturally flawless.

Mineralogie offers a complete range of cosmetics for the face, eyes, lips and body. For distribution enquiries please contact Mineralogie on **03 9545 0073** or visit www.mineralogie.com.au
